Triangular Prism

PRACTICING

Draw and label the 2D shapes in your Global Knowledge notebook.

Look for real life examples of 3D shapes and list them down in your notebook.

For example - a toilet paper roll has the shape of a cylinder.

Can you find around your house cubes, spheres and other 3D shapes?

Choose one of the 3D templates, print and assemble (cut and fold) and show to your friends. <https://www.fun-stuff-to-do.com/printable-shapes.html>
